PROFILE

I am a self-taught frontend web developer using ReactJS. I am seeking to make myself a highly qualified frontend software engineer. I have a passion for frontend software engineering. I am an active member of a software developer community called Virtual Coffee. I spend my time studying from high quality learning materials, such as Frontend Masters, Plural Sight, Free Code Camp and MDN Web Docs. I work on frontend projects daily. *I am building projects with HTML, CSS, Javascript, React and Bootstrap.* I am seeking opportunities to access education and knowledge which will give me the skills I need to achieve my educational and professional goals in the field of software engineering.
